

Sponsoring Opportunities

6th Conference on Carbon Dioxide as Feedstock for Fuels, Chemistry and Polymers

15 – 16 March 2018, Maternushaus, Cologne, Germany

<http://co2-chemistry.eu>

One of the leading events on Carbon Capture and Utilization (CCU) in the world!

Dear Sir or Madam,

We would like to invite you to join us as a sponsor of our well established 6th Conference on Carbon Dioxide as Feedstock for Fuels, Chemistry and Polymers.

In the last years, the explosion of interest in CO₂ has led to a new awareness at industrial, societal and scientific levels with the result that CO₂ is no longer a mere waste product, but rather an abundant, low cost raw material. Using carbon dioxide as feedstock for fuels, chemistry and polymers is both a challenge and a chance for our sustainable future and has immense potential in the coming decade – much faster than expected! Our goal is to connect more than 200 expected participants from leading industrial and academic players in CO₂ utilization and to share their recent success stories, as well as new ideas, projects and plants in implementation. We hope you will be part of this opportunity to get in touch with an innovative and active network.

Top-class participants from the following sectors will be present at the conference:

Chemical, automotive, fuels and plastics industry ++ Policy makers ++ Research & Development/Universities ++ Associations/Stakeholders ++ Raw material suppliers ++ Service suppliers ++ Trade and import houses ++ Engineering ++ Press ++ Machinery suppliers ++ Consulting

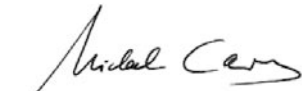

On the next page you will find a range of sponsorship options. We are also open to new ideas and would be delighted to help you realising them. All you need to do is contact us if one or more of these options appeal to you or if you would like to put forward a proposal of your own!

Dr. Asta Partanen:
