

Policy and Sustainability in CCU – A Status Quo

Presenters: Nicolas Hark and Matthias Stratmann (both nova-Institute)

Abstract: Carbon Capture and Utilisation technologies are growing in importance in various application cases in the EU and globally. On the one hand, we give a brief overview on how the EU policy landscape has changed recently and how it feeds into these developments. On the other, considerations of how the sustainability of CCU is seen is also part of this presentation on the status quo of CCU.
